Class Deviation RFO-2025-27

MEMORANDUM TO: Acquisition Management Division and Buyers in the Regions

FROM: Nicole Stevenson, Acting Director  
Acquisition Management Division  
Office of Administration

SUBJECT: FAR Class Deviation for FAR Part 27 in Support of Executive Order 14275 on Restoring Common Sense to Federal Procurement

*Nicole Stevenson* Signed by Stevenson, Nicole  
on 11/18/25

**1. PURPOSE:** This memorandum approves a class deviation to Federal Acquisition Regulation (FAR) Part 27, "Patents, Data, and Copyrights" for purposes of implementing the Federal Acquisition Regulatory Council's (the Council's) model deviation text to FAR Part 27 to prioritize plain language, resulting in more direct, active, and accessible text. Notable changes include the streamlining of Subpart 27.4, Rights in Data and Copyrights and revised Section 27.405, Other Data Rights Provisions, which provide descriptive guidance that contracts "must specifically address the Government's rights" and that agencies are "authorized to specially negotiate" terms.

In this regard, Section 27.407, Rights to Technical Data in Successful Proposals, has been updated to include, if needed, negotiating appropriate Government license rights for technical data when reviewing successful proposals. A notable change is that FAR 52.227-19 (Commercial Computer Software License) is removed because it is not a mandatory clause and does not constitute an adequate substitute for a well-drafted end user license agreement. The underlying rule set forth in FAR 27.405-3(a) is the law – that the Government acquires commercial computer software "under licenses customarily provided to the public to the extent the license is consistent with Federal law and otherwise satisfies the Government's needs."

**2. BACKGROUND:** [Executive Order \(E.O.\) 14275 on Restoring Common Sense to Federal Procurement](#) signed April 15, 2025, mandates a comprehensive review and simplification of the Federal Acquisition Regulation (FAR).

The FAR is being updated to:

- Eliminate non-statutory language
- Remove redundant or obsolete language
- Enhance clarity through plain language
- Align with the new FAR framework
- Preserve essential governmentwide acquisition standards

This project is referred to as the Revolutionary FAR Overhaul (RFO) initiative. This initiative will make the FAR more concise, understandable, and focused on core procurement requirements.

**3. SUMMARY OF CHANGES:** FAR Part 27, Patents, Data, and Copyrights, governs intellectual property rights in government contracts, explaining how parties acquire rights, how rights are licensed or shared, and how to protect both government and contractor interests. It has been updated with important plain language updates, enhanced clarity, and improved readability.

Statutory requirements retained in the RFO FAR Part 27 model deviation include, but may not be limited to, the following:

- 10 U.S.C. § 3793, Copyrights, Patents, Designs
- 15 U.S.C. § 638, Research and Development
- 17 U.S.C. §§ 101 *et. seq.*, Copyrights
- 18 U.S.C. § 798, Disclosure of Classified Information
- 28 U.S.C. § 1498, Patent and Copyright Cases
- 35 U.S.C. §§ 200 *et. seq.*, Patent Rights in Inventions Made with Federal Assistance
- 41 U.S.C. § 2302, Rights in Technical Data
